INVESTMENT PROCESS

- The Co-CIOs and their team of equity analysts employ Gotham's proprietary analytical framework to evaluate stocks within the coverage universe on measures of absolute and relative value.
- Gotham's equity research and risk controls are used to select long and short stock portfolios primarily from the U.S. large and mid-cap range.
- The long (short) portfolio is rebalanced daily to weight most heavily those stocks priced at the largest discount (premium) to Gotham's assessment of value.
- In general, as a company appears cheaper, it's weight in the portfolio increases.
- Risk for the fund is managed by limiting concentration in any one company, industry or sector. In addition, gross and net exposures are managed daily to remain within carefully defined ranges.

*The Gotham Neutral Fund is designed to be market neutral, which means the fund seeks to achieve returns that are not closely correlated, in most cases, with the returns of the U.S. equity markets.

The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. The performance quoted does not reflect a 1% redemption fee on shares redeemed within 30 days of purchase. Returns would have been lower if certain expenses had not been reduced or reimbursed. Current performance may be lower or higher than the performance quoted here. To obtain performance current to the most recent month-end, please call 877-974-6852 or visit www.gothamfunds.com/performance.aspx.

Mutual fund investing involves risks, including possible loss of principal. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. The fund will use leverage to make additional investments which could result in greater losses than if the fund were not leveraged. The fund utilizes swap agreements in its investment program. The use of derivatives such as swaps exposes the fund to additional risks including increased volatility, lack of liquidity and possible losses greater than the fund's initial investment. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover which may increase brokerage costs. The fund may invest in large, mid and small cap companies. Small and mid cap equity securities may be more volatile and less liquid than the securities of larger companies.

An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and summary prospectus contains this and other information about the fund. To obtain a copy of the prospectus and summary prospectus, please call 877-974-6852 or visit www.GothamFunds.com. The prospectus and summary prospectus should be read carefully before investing.
